

Falcon Aircraft Mechanic (A&P)

Location: Amarillo, Tx

Employment Type: Full-Time

The Opportunity

We are seeking an experienced Aircraft Mechanic with strong Falcon 50 experience to join our maintenance team. While our operation includes work on other aircraft as needed, this position is primarily focused on supporting a Falcon 50 fleet.

This role is well-suited for a mechanic who values technical depth on the Falcon platform, while still being comfortable supporting additional aircraft types when required.

Responsibilities

- Perform scheduled and unscheduled maintenance on Dassault Falcon 50 aircraft
- Assist with maintenance and inspections on other aircraft types as operational needs require
- Troubleshoot and repair aircraft systems including airframe, engines, avionics, electrical, hydraulic, and environmental systems
- Perform inspections in accordance with FAA regulations, manufacturer manuals, and company procedures
- Accurately complete maintenance records and logbook entries
- Coordinate with maintenance control, inspectors, and flight crews
- Maintain a safe, organized, and professional work environment

Qualifications

- FAA Airframe & Powerplant (A&P) Certificate (required)

- Falcon experience required; **Falcon 50 experience strongly desired**
- Solid troubleshooting and problem-solving skills
- Familiarity with FARs and maintenance documentation
- Ability to work flexible schedules, including occasional nights or weekends
- Valid driver's license and ability to pass background and drug screening

Preferred Experience

- Dassault or Falcon factory training
- Part 135 or Part 91 operational experience
- Avionics troubleshooting experience
- Inspection Authorization (IA)

What We Offer

- Competitive compensation based on experience
- Primary focus on Falcon 50 maintenance
- Variety through additional aircraft support as needed
- Stable operation with an organized maintenance team
- Overtime opportunities
- Benefits package [if applicable]
